

ACE PROFI 40 ACE PROFI 40X

RF PEDESTAL SYSTEM

Powerful RF (Radio-Frequency) **mono system** designed to operate as a single antenna system or in multiple antenna configurations.

The new RF ACE system is suitable for any environment, with a performance that ranks at the top of the retail security market. To make it powerful yet cost effective solution you can connect **passive antenna** to get a cost effective dual antenna system.

While still taking advantage of RF technology, we have made the ACE PROFI system compatible with platform of **RFID** antennas that can be seamlessly integrated inside pedestals. This solution provides retailers a soft transition from traditional EAS systems to article surveillance with additional **RFID** protection and inventory management option.

The RF ACE PROFI supports remote connectivity and data collection and can also be connected to our **STOREMONITOR** cloud platform for advanced system and store performance reports and analytics.

In addition to all these options and features, the system is equipped with our new smart **ECO MODE** that saves up to 35% of the EAS energy consumption. This way we help to reduce our customer's unnecessary utility costs, increase lifespan of the system and stay environmentally friendly.

Features & options:

- Remote maintenance and diagnostics 
- RFID
- Advertisement space
- Metal detection
- Visitor counting
- Smart directional alarms
- Tag too close indication
- **ECO MODE**

Integrated smart visitor counting and data collection through our StoreMonitor cloud application will provide you with essential data you need, not only to monitor the system functionality and status, but to provide valuable insights into your store performance and sales efficiency.

Remote connectivity and data collection are standard inbuilt features of the RF ACE systems. It ensures that our systems are not only easy to install but can also be serviced and maintained remotely with fast response and without unnecessary travel costs.

An **advertisement** panel on your security system can be an additional sales tool with our “easy slide” access to printed banner replacement. An identical pedestal but without the opaque panel, the Profi X pedestal features a transparent acrylic surface that blends in with the surrounding space.

Retailers facing losses due to professional shoplifters, can upgrade their RF ACE systems with **Magnet detection** feature that is easily available for extra security.

When connected to our **STOREMONITOR** cloud analytics all essential data from visitor counters, alarm management and system operation are available for further processing. You can evaluate your store or system performance in advanced graphs and overviews or set up reports to be automatically sent to your mailbox or uploaded to your existing system.
